

Task 2 :

Make this using HTML and CSS.

RULES TO BE FOLLOWED :

- Don't use any css frameworks like bootstrap/materialize.
- Don't use any kind of scripting. Only pure HTML and CSS.
- There is no need to implement same as above image, you can tweak it only if it is visually better than this.
- This is for your learning purpose, Don't try to copy and paste code and even if you do, make sure you understand it properly as it will be verified.
